Impact Report 2025

ABOUT US

Creating a More Inclusive Africa

Motivation Africa is a disability inclusion organisation working to ensure that disabled people can live healthy, independent and fulfilling lives.

We believe that a wheelchair is more than a piece of equipment. It is a gateway to education, employment, healthcare, family life and full participation in society. That's why we focus not only on providing appropriate wheelchairs, but also on strengthening the systems, services and skills needed to ensure every wheelchair user receives the right support at the right time.

Through partnerships with governments, healthcare providers, universities, organisations of persons with disabilities and local communities, we are building sustainable wheelchair services across Africa.

Our Vision

We envision an Africa where every disabled person has equal opportunities to participate, contribute and thrive.
Our work is guided by the principles of the United Nations Convention on the Rights of Persons with Disabilities (UNCRPD) and the WHO Guidelines on Wheelchair Provision.
We believe disability is not created by a person's impairment, but by the barriers that prevent people from participating fully in society.
By removing those barriers, we help create communities where everyone belongs.

Building Sustainable Change

Lasting change requires more than providing wheelchairs.
We strengthen health systems by training wheelchair service providers, supporting peer trainers, empowering caregivers and families, developing skilled workforces, improving referral pathways and advocating for disability-inclusive policies. Together with our partners, we are creating sustainable solutions that continue long after individual projects end.

OUR IMPACT IN 2025

We exist to make a difference. We strive to build a fully inclusive world, so everyone has the respect, equality and autonomy they are entitled to.

1,078

disabled people were individually assessed, prescribed and fitted with wheelchairs and offered mobility and life skills training through our wheelchair service partners.

648

Caregivers accessed savings groups and livelihood programmes, creating opportunities for income generation and financial resilience.

327

staff from civil society, non-governmental and governmental organisations increased their understanding of assistive technologies such as wheelchairs.

108

disabled people took up livelihood financial support to build their financial autonomy.

188

caregivers and family members learnt about wheelchair skills and maintenance, to better support wheelchair users with their new, appropriate wheelchair

75

physiotherapists, technicians, occupational therapists and community-based rehabilitation workers added to their wheelchair provision skills and knowledge.

20

Motivation Peer Trainers(MPTs) trained to support and encourage other wheelchair users.

468

caregivers were trained to better support children's health and development.

30

technicians were trained in wheelchair repair and maintenance

21

rehabilitation workers received training on Referral, Screening and Follow Up

Miracle is a 15-year-old boy who lives with her grandparents, who have cared for her with love and dedication since childhood.

Born with hydrocephalus, Miracle faced significant mobility challenges that limited his ability to take part in everyday activities.

Because the wheelchair did not meet his needs, Miracle often spent much of her time indoors and depended heavily on his grandparents for movement and daily activities.

In October 2025, Miracle received an appropriate wheelchair through the wheelchair service programme. Since then, her life has changed significantly.

He can now attend school, go to church, and spend time with friends, allowing him to participate more fully in family and community life.

The wheelchair has also eased the burden on his grandparents, who no longer need to carry him from place to place. This has given them more time to focus on household responsibilities and other activities.

> “Seeing Miracle go to school, church and spend time with his friends brings us so much joy. He is happier, more active and able to do things that were very difficult before.”
>
> Miracle's grandmother

“Basic wheelchair training has made me a great clinician—a shift from clinical to technical. I now have the confidence to assist a wheelchair user effectively.”

Kenya

“Follow-ups by Motivation Peer Trainers provide ongoing support, reinforce skills, and help wheelchair users achieve greater independence.”

“I can confidently feed my child. Thanks to the Parent care Training.”

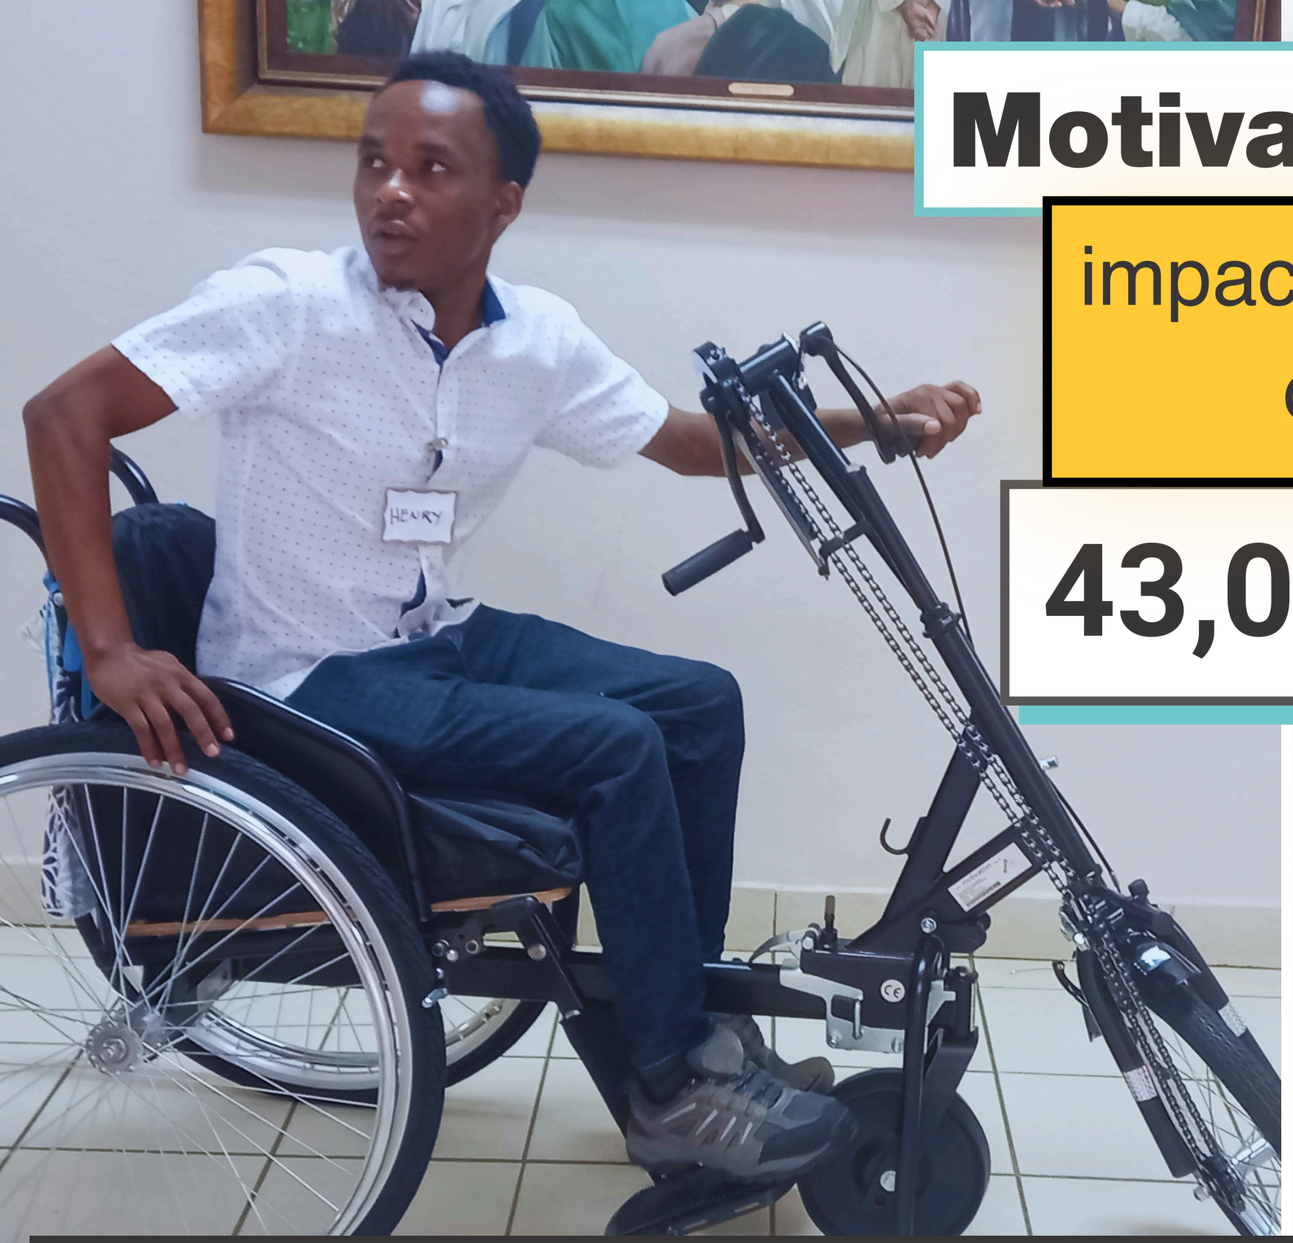

“Hearing from a wheelchair user has shifted my perspective on wheelcair provision. I know better and will do better.”

Motivation Africa

impacted the lives of over

43,000 People

None of our work would be possible without the disabled people, families, communities, partners, supporters and funders that we work alongside.

Thanks to each and every one of you!
